Subject: HB 5102

To the Honorable Ray Franz

Dear Sir:

After failing to get their way on the Construction Code Commission, the fire service is now attempting to game the system with a power play to stack the Commission with people of their choosing. If you go along with this, it will adversely affect the code promulgation process and disrupt the good work currently being done by reasonable people on the Commission.

On behalf of the over 1,000 construction code professionals in the state of Michigan, the Code Officials Conference of Michigan urges you to kill this outrageous legislation. There are many things that the builders and inspectors disagree on, but we stand together in opposition of this proposed Bill.

Mike Winkler, Building Official & President of Code Officials Conference of Michigan
